

Mr. Madewell's Summer Reading List for Physical Science

All books are available on Amazon.com. I would urge students to explore it to find out more about the book, possibly read the first pages or chapter before selecting a book.

All students must present their books using a video platform such as iMovie or a slide show using Google Slides or PowerPoint or similar programs. Presentations should not take more than three minutes and should not tell the whole story of the book. iMovie trailers are not appropriate for summer reading presentations. All presentations are due the second week of school (Aug 14-18).
